TIPS FOR REDUCING THE USE OF OUR NATURAL RESOURCES

- Switch off computer monitors and lights when you leave for lunch or meetings. Screen savers do not save energy.
- Use environmentally-friendly materials such as used newspaper for padding instead of bubble wrap or foam peanuts when shipping materials.
- Use a durable mug or glass instead of a disposable cup.
- Reduce your office paper usage by always printing double-sided, using the print preview function and only printing what you need.
- Reuse items in good condition, donate what you don't need.
